I want to test the mobile phone before buying it so that I can see if it causes interference with my CI and also to make sure the volume
control is strong enough.This saves the hassle of purchasing it, signing a service contract, and then trying it when I get home only to find I cannot use the phone.

I also want to get instructions on how to use the phone in actual real time. These phones can be so complicated to use! Thanks for your help with this.

Tommie
